Summary

TPU case for flipper zero

Gadgets > Portable Devices

Tags: `case` `flipper` `flipperzero` `protector` `tpu`

The only other TPU case for flipper zero did not cut it for me, so had to create my own.

I would recommend printing this in softest TPU possible, as it might be a bit hard to put it on the flipper.

history

- v1 initial release
- v2 wider cutout in front. should be easier to put it on now.
- v3 is the as v2, but slightly larger, to allow a bit of offset between the case inside walls and flipper
- v4 turns out its a bit hard to charge flipper with the case on. so v4 makes the charging port accessible.

Model files
